

Carbon Reduction Plan Template

Supplier name:Evolan Pharma AB.....

Publication date: ...8th April 2025.....

Commitment to achieving Net Zero

Evolan Pharma AB is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations.	
Since 2019, Evolan has increased its sales turnover with 111%. Hence, there has been a huge growth reflected in the increase in emissions. However, in 2019 the emissions were 0.65 per MSEK vs. 0.47 in 2024. This is a reduction of 28% per MSEK.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	32
Scope 2	
Scope 3 (Included Sources)	275
Total Emissions	307

Current Emissions Reporting

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	18
Scope 2	
Scope 3 (Included Sources)	458
Total Emissions	476

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 400 tCO₂e by 2029. This is a reduction of 12%

Progress against these targets can be seen in the graph below:

Carbon Reduction: Projected vs. Actual

Carbon Reduction Projects

In the future we hope to implement further measures such as:

- Completely moving to company cars that only uses renewable energy.
- As far as possible only use transportation of goods that utilises renewable energy.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
